

Mission package 1 – Problem Solving (Archetype: Coordinator)

- Ensure that your team has a **clear view of what they want to achieve/resolve on 2 levels**
 1. For the case: What is the basic question to be resolved/what must be solved to deliver distinctive impact for the decision-maker in the case? What are potential sub-questions?
 2. Overall, by the end of today's session: What do we want to achieve today based on our personal learning goals for this training as well as what do we have to achieve given our individual "mission packages"?
- Ensure that your team has a **robust and logical problem structure** which can be used as a basis for work planning on Day 2

Here you can leverage following resources:

1. *Your facilitator who can provide learning bursts on "Problem definition" and "Problem structuring". He can offer you one slot for each topic (duration 20 mins each):*

1. *between 9.30 and 10.30 and*
2. *between 11.00 and 12.00*

Please take into account here:

- *You need to be present as a whole team!*
- *Arrange an appointment for your team with the facilitator via chat function in Zoom*
- *First come – first serve!*

2. *Additional material:*

- *"How do we learn"- 3 min video (mp4 format)*
- *"Concept of neuroplasticity in learning – Lara Boyd, Brain researcher at British Columbia" (15 mins on YouTube: <https://www.youtube.com/watch?v=LNHBMFCzznE>)*
- *Or alternatively for pure German-speaking cohorts: "Human learning/problem solving ability vs. Artificial Intelligence" - Dr. Henning Beck, Brain researcher and speaker (20 mins on YouTube: <https://www.youtube.com/watch?v=D6h1Qk-63vU>)*
