

Mission package 2 – Expert info (Archetype: Expert)

Ensure that you gain the required expertise to **provide your team with the necessary information to be able to structure the case**

- Benefits side: In addition to the main effect on Sustainability there might be further (side) effects on Henkel's organisation
- Invest side: What is the degree of Henkel's involvement and what is the potential invest needed?
- What might be further relevant stakeholder in the context of an Energy Community whose perspectives/demands potentially need to be addressed?

Here you can leverage following resources:

1. The expert on Energy Communities implementation

- You will be able to access a comprehensive interview with such an expert conducted by the facilitator on topics above. You can watch it whenever you think it's the right timing for your team (duration: 50 mins)
- BUT**: you need to solve the following exercise to be able to access it. Please send the evidence picture privately via chat to "Zoom support". You will receive the link to the video in exchange.

Exercise:

An essential element of an energy community are the members' own energy-producing devices (for those who act as prosumers). During the course of the workshop, we will look at solution for a rocking solar panel. In advance we will think about the mounting. For this purpose, you need to create a ring large enough to fix a solar panel on the roof. As little material as possible should be used for this. To practise this in advance, please solve the "Sheet of paper step-through"-exercise, as explained in detail below, with just a sheet of paper and scissors:

▶ SHEET OF PAPER STEP-THROUGH EXERCISE

Time: appr. 10 minutes

Task: Devise a way of cutting the sheet of paper so that it creates a ring - without any breaks or joins - large enough that at least one of your team member can step through the ring. If you will find a way how to step through as entire team virtually you will get extra reward

Tools: Allowed

Not allowed

If you will find a way to prove that the entire team is able to step through your created ring you will get the additional information mentioned in the expert interview.
