

Mission package 3 – Overarching Goals and Stakeholder Management (Archetype: Strategist)

1. Recall what was the overarching organisational goal for the project and **ensure the connection of this overarching to the team’s goal of today**. Prevent your team from losing sight of this connection and get lost in details
2. Ensure that your team has the **connection to the “outer world”**/other stakeholders’ perspectives to potentially amend your problem definition and structure
3. Think through **where you could get the information about relevant stakeholders** in the context of Energy Communities and their perspectives

Useful material:

- *Material on System Dynamics on IM I Learning Platform, Module 4*
- *Stakeholder Management_Frameworks (PDF file)*
